

# DARPA PLANNED PROCUREMENTS

By

Larry Lynn  
Director, DARPA

September 25, 1997

1

Thank you for coming to DARPATech '97. We hope that you received useful information over the last few days. We appreciate your attention and attendance, especially those of you that have lasted through all of the talks and made it all the way to this last one.

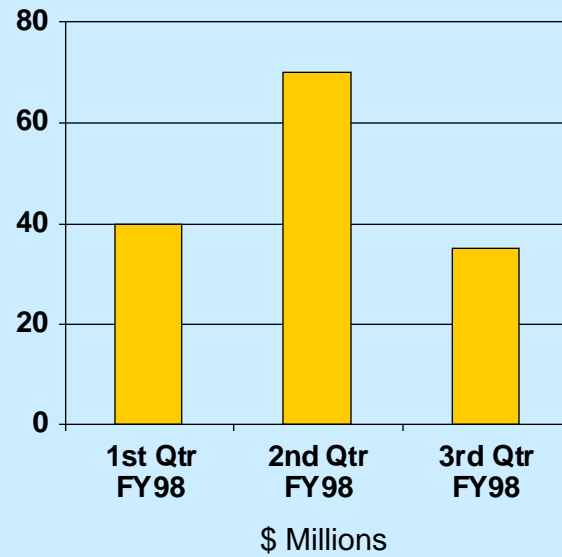

I would like to recognize all of the behind-the-scenes efforts that have gone on to make this conference the success that it has been. We have had small groups of very hard workers that have labored to plan and execute this conference, and we owe them a round of applause, and our thanks for a job well-done.

As you know, one of the aims of this conference is to let you know what technology areas and programs we think are important and to solicit your ideas. We hope that we can continue the very helpful dialogue that we have been able to start over the last few days. Now, let me show you a few charts that summarize the procurements we currently plan over the next year or so. I must emphasize that these are our current plans, subject to change. I will not spend much time on each of these charts. You will receive, at the conclusion of my talk, a handout that will provide much more detail. It will include a short explanation of each project, the approximate dollar level expected and when we plan to issue our BAA. In addition, it includes the name of the program manager who will be managing the program. I encourage you to contact them to discuss any ideas you may have.

# DSO PLANNED PROCUREMENTS

- Materials / Processing
- Electromagnetic Materials
- Adv Computational Math
- Bio Warfare Defense

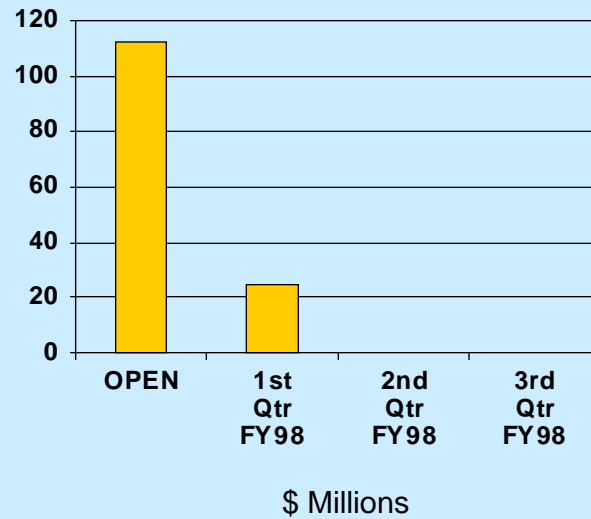

2

[See Table](#)

# ETO PLANNED PROCUREMENTS

- MEMS
- VLSI Photonics
- Sonoelectronics
- Microfluidics

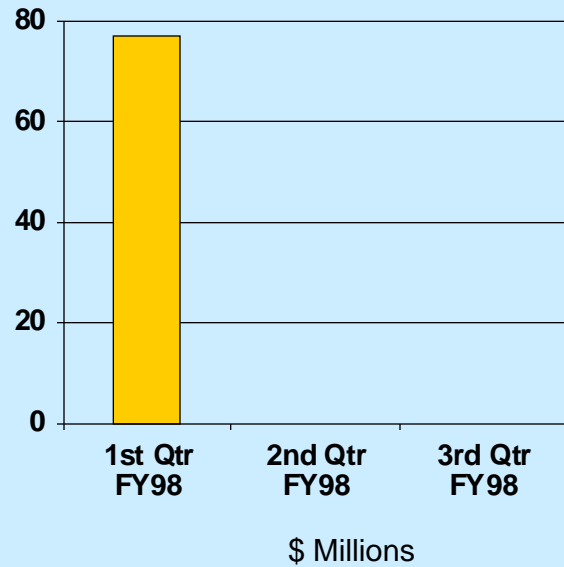

3

[See Table](#)

# ITO PLANNED PROCUREMENTS

- UltraScale Computing
- Next Generation Internet
- Active Networks
- Global Mobile
- Info Survivability

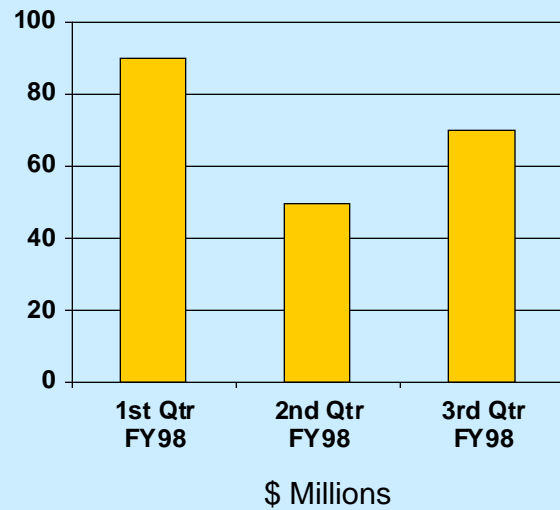

4

[See Table](#)

# ISO PLANNED PROCUREMENTS

- Battlefield Awareness
- C2 Initiatives
  - Agent Based Systems, Command Post of the Future
- Airborne Comm Node
- JFACC

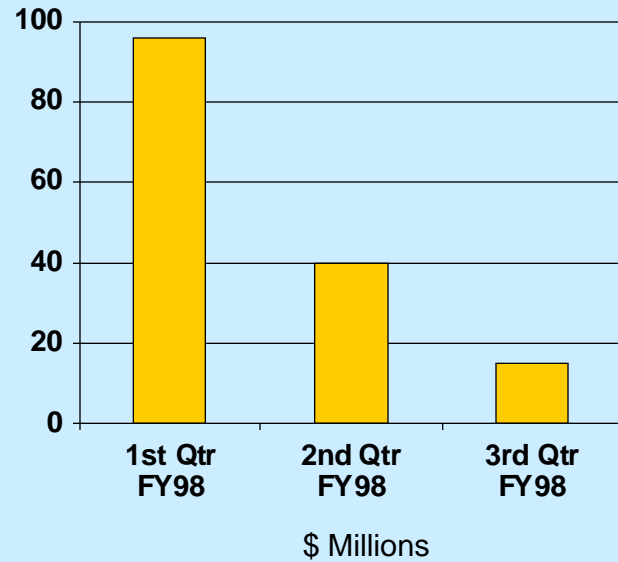

5

[See Table](#)

# TTO PLANNED PROCUREMENTS

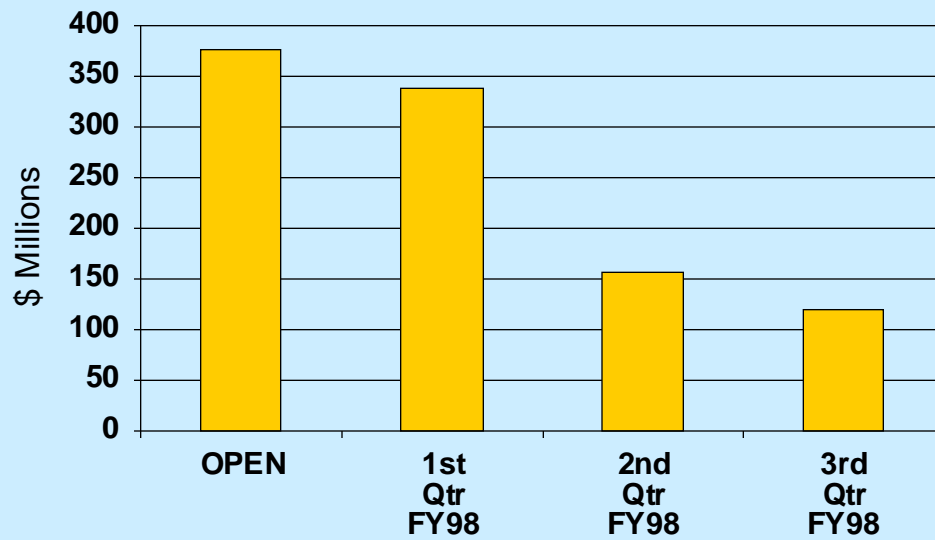

- Adaptive Spectral Recon
- AT3
- Small Unit Situational Awareness
- Advanced Fire Support
- Robotics
